

A **BELDEN** COMPANY

樂庭國際有限公司

LTK International Limited

- 樂庭電線工業（惠州）有限公司 /

LTK Electric Wire (Huizhou) Limited

樂庭國際有限公司推行的環保政策超越了ISO14001的標準要求，務求減低生產對環境的影響。樂庭於去年成立一個中央環境健康及安全部門，處理和協調有關營運所衍生的環境、健康及安全問題。樂庭推行一系列改善環境的措施，包括在廠房使用太陽能熱水系統、冷卻水幕牆及採光板以節省用電量；又利用回收水系統循環使用冷卻水，以減少生產過程的耗水量；並安裝空氣過濾系統及相關機器以改善室內空氣質素。

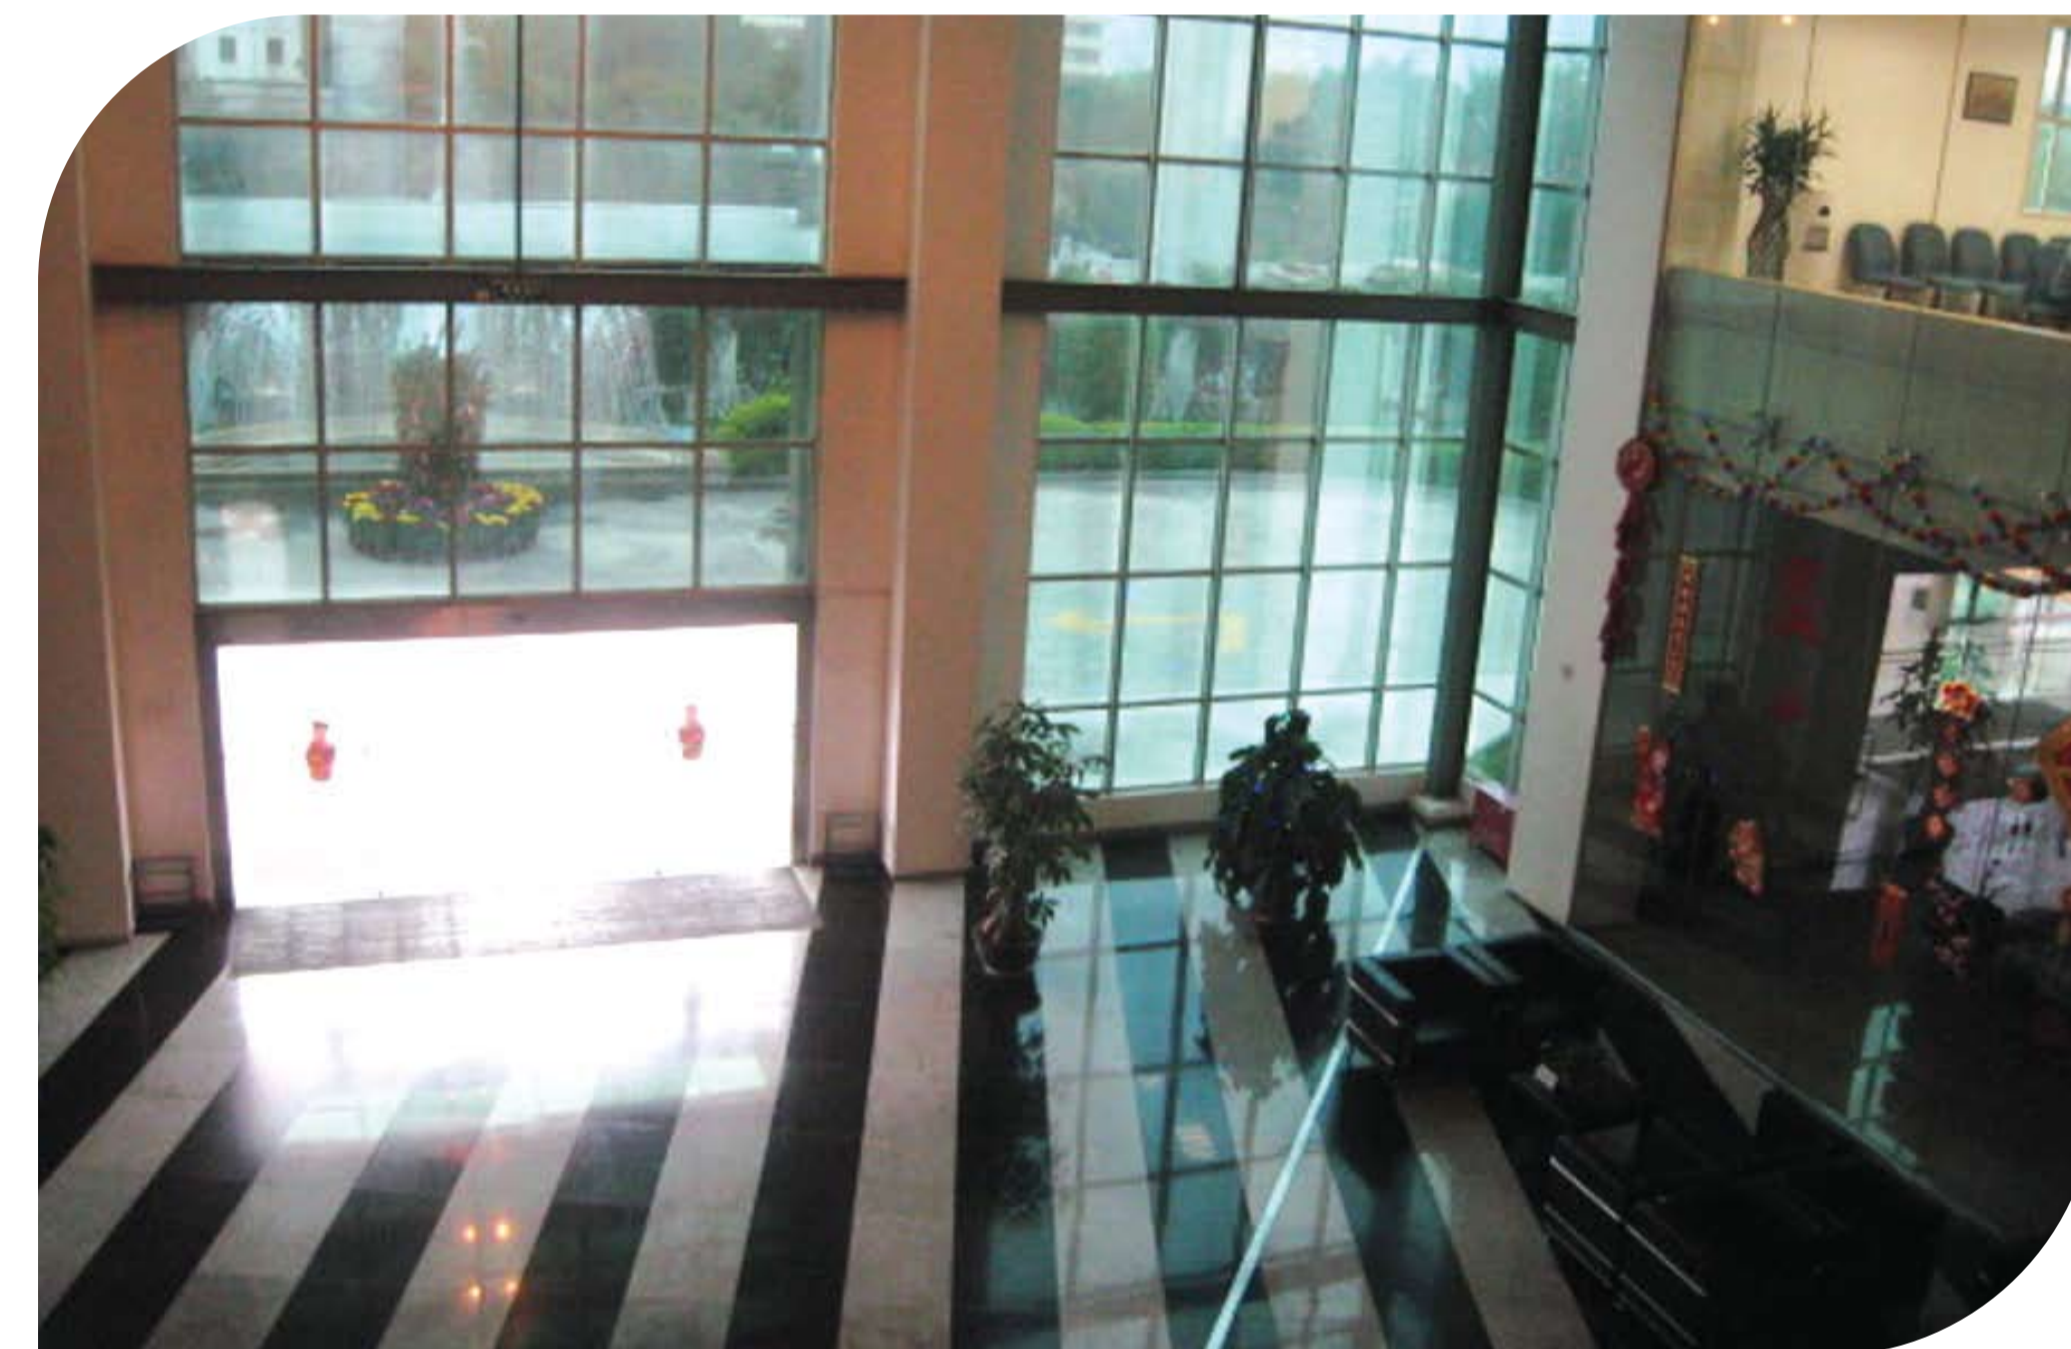

LTK International Limited adopts an environmental policy beyond ISO14001 requirements to control its environmental impact. A centralized Environmental, Health & Safety (EHS) department has been set up to manage and coordinate EHS issues. A number of measures are now in place to improve its environmental performance, including use of solar water heating system, a water cooling curtain and reflective roof in the production plants, so as to reduce electricity consumption. A cooling water recycling system is installed to re-circulate cooling water and minimize water consumption during the production process. An air filtration system is also installed to improve the indoor air quality to provide a healthier and safer working environment.

把原本暴露在外的機頭加熱器改裝在內部，減少熱能散失，節省用電。
The extruder heater is moved to the center to minimize heat loss and reduce electricity consumption.

於公司入口處展示環境健康及安全方針，向公眾傳達我們在這方面的要求。
Display of our EHS policy at the main entrance to publicize our EHS requirement.

入口處、圖書館和會議室都使用透光玻璃，在日照期間可關閉全部或部份照明系統，節省電力。
Extensive use of glass in the entrance, library and the meeting room reduces electricity consumption as lighting is no longer needed.

為部分產生高噪音的編織機安裝隔音罩，將車間噪音降低達約15dB。
Some braiders are covered and equipped with noise absorbent, which can reduce noise level by 15dB.

在員工宿舍安裝的太陽能熱水器所產生的熱水，足以供600個員工同時使用。
The solar water heating system installed in the dormitory can provide hot water to 600 people simultaneously.

地下循環水池可收集生產時排出的冷卻水，並將之循環使用。此水池的循環水還可作為消防儲備水。
Cooling water is collected and re-circulated for production use through the underground water tank. The collected water can also be used for fire-fighting.
