九龍巴士(一九三三)有限公司 The Kowloon Motor Bus Company (1933) Limited

作為本港載客量最高的巴士公司，九巴貫徹保護環境的承諾，採取了不同環保措施，為締造更清新的環境作出貢獻。當中包括率先引進配備歐盟第五代環保引擎的巴士、為所有車長提供環保駕駛培訓及於旗下巴士安裝微粒過濾器。

In line with its dedication to good environmental management, KMB has implemented various measures aiming to contribute to a cleaner environment. These measures include trialing Euro V buses, providing Eco-driving training to bus captains and installing Diesel Particulate Filters on buses, as well as an array of other green measures.

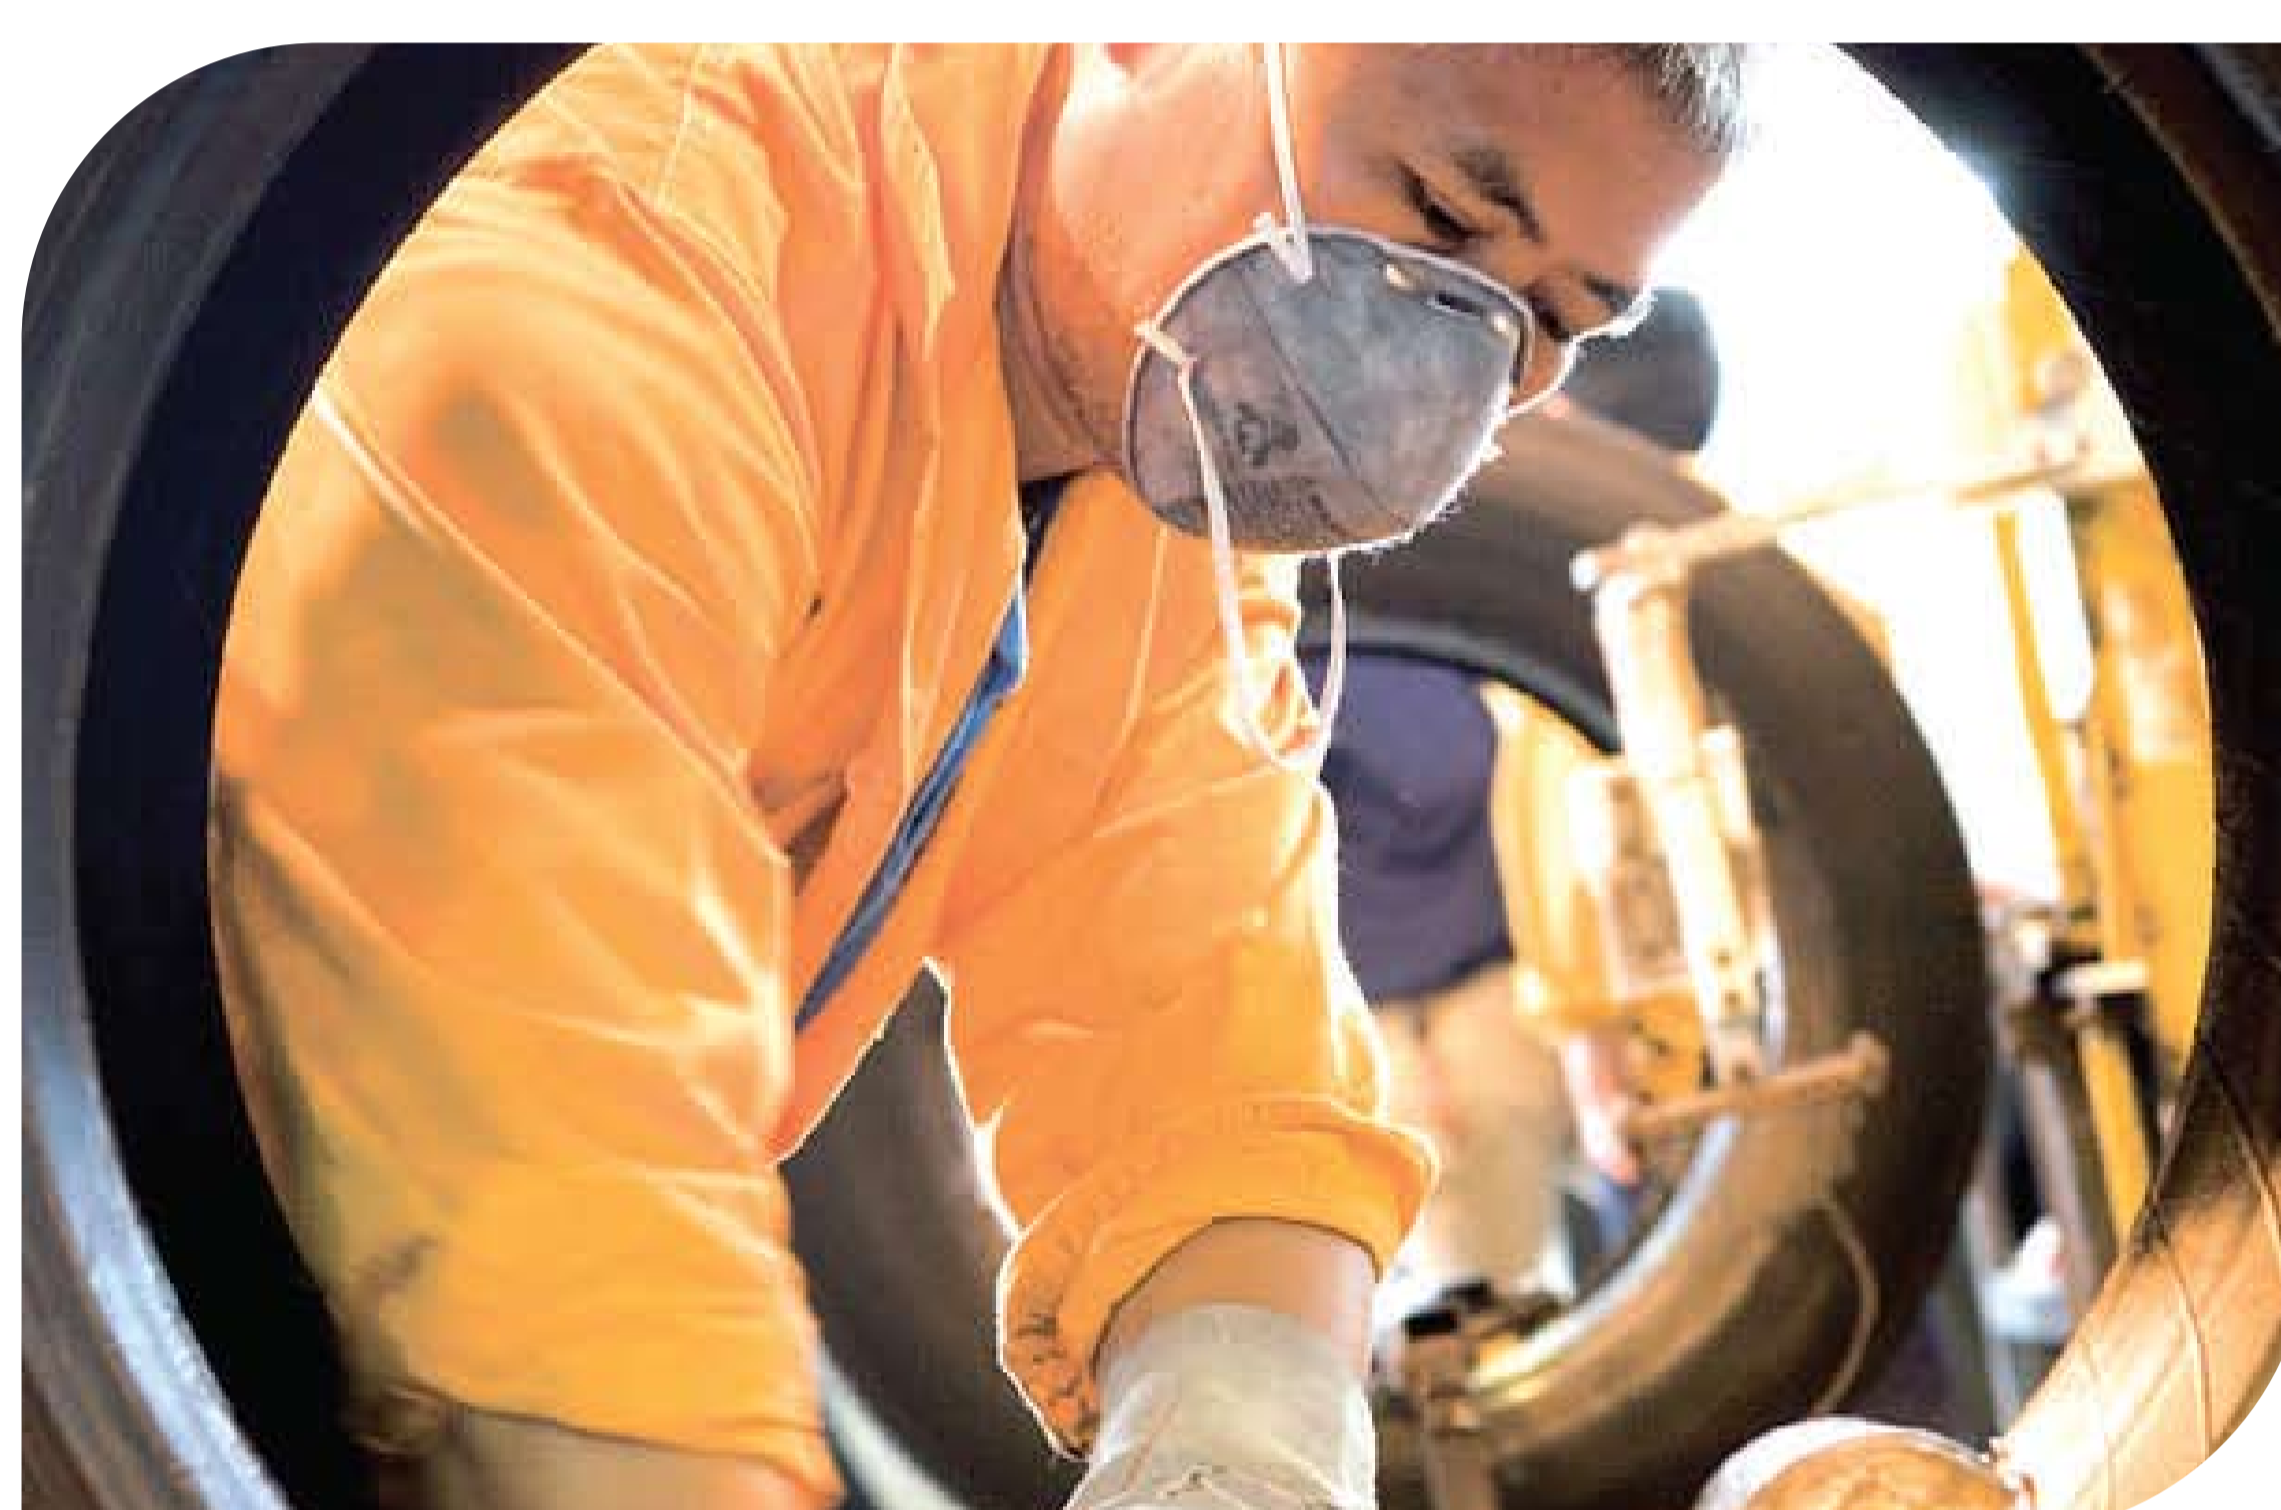

為了貫徹保護環境的承諾，九巴採取了不同措施，在改善巴士服務表現的同時，為締造更清新的環境作出貢獻。

In line with KMB's dedication to environmental protection, KMB has implemented various measures aiming to improve the performance of its buses as well as contribute to a cleaner environment.

九巴每日清洗巴士所需要的一千二百萬公升水，會經由系統處理後循環再用。

The 1.2 million litres of water used every day to clean the KMB bus fleet are treated by the water recycling system for reuse.

車胎翻新儀器：九巴車隊每日合共使用超過33,000條車胎，當中超過60%是翻新車胎。

Our own retreading workshop: Over 60% of the 33,000 bus tyres in use on KMB buses are re-treaded.

九巴於2006年參與光管回收計劃，積極減少固體廢物，響應保護環境。

In 2006, KMB participated in the fluorescent tube recycling programme, contributing to reducing solid waste and protecting the environment.

九巴車長訓練學校為每一位車長進行『環保駕駛』培訓，節省能源的同時亦能減少空氣及噪音污染。

The KMB Bus Captain Training School provides each bus captain with training on Eco-driving, which not only saves resources, but also mitigates noise impact.
