### 邁向低碳營運模式

國泰航空繼續實行機隊現代化計劃，引入五架波音777-300ERs延程型飛機。隨著波音747-200型貨機退役，我們在二零零九年加入波音747-400ERFs型貨機，更新的機隊可減低燃油耗用量和維修成本，另外，我們優化運作程序和航道，亦可大幅提高效益。

### Moving Towards a Low Carbon Business Model

In 2009, we continued our fleet modernisation programme and introduced 5 more Boeing 777-300ERs (Extended Range aircraft). In addition to introducing more the fuel-efficient ultra long-haul Boeing 747-400ERFs in our fleet, we retired all remaining Boeing 747-200 Classic freighters. We succeeded in further reducing flight emissions through modernising our fleet, enhancing operational procedures, and optimising routes.

Tackling Emissions - Not just in the Air, but also on the Ground:  
Waste management.

Tackling Emissions - Not just in the Air, but also on  
the Ground: Renewable energy.
