

香港環境 卓越大獎

Hong Kong Awards for
Environmental Excellence

公營機構及公用事業

Public Organisations and Utilities

香港機場管理局

Airport Authority Hong Kong

機管局致力妥善管理環保表現，更訂立涵蓋11個範疇的五年環保計劃，使香港國際機場成為全球最環保機場之一。

Aiming to be one of the world's greenest airports, the Airport Authority Hong Kong (AAHK) is committed to managing Hong Kong International Airport's (HKIA) environmental footprint and has established its Five-Year Environmental Plan which covers 11 aspects.

金獎
Gold Award

機管局在2014年底禁止飛機在停機位使用輔助動力裝置，飛機在停機位需使用固定地面供電系統及預調空氣系統，減少使用燃油及降低排放。

By the end of 2014, AAHK banned the use of auxiliary power unit (APU) by aircrafts while at parking stands. Aircrafts have to use fixed ground power (FGP) and pre-conditioned air (PCA) systems for support. This lowers the use of fuel and the relevant emission.

由2013年起，所有在禁區內使用的新汽車需由電力發動；而以燃油發動的汽車將在2017年停用。機管局亦預留了港幣220萬補貼商業夥伴購置電動汽車。

Starting from 2013, new saloon cars running in Restricted Area should be powered by electricity and the fossil fuel-powered saloon cars will be banned from 2017. AAHK has also reserved \$2.2 million for subsidising business partners for replacement of electric vehicles.

自2011年起，免費為機場內的商業伙伴提供廚餘回收服務。機管局及17個機場內的商業伙伴在2013年共回收了1,600噸廚餘以製成堆肥及魚飼料。

Food waste recycling service has been provided to all business partners within the airport free-of-charge since 2011. In 2013, AAHK has collected around 1,600 tonnes food waste from AAHK and 17 business partners for composting and producing fish feed.
