2024 HONG KONG AWARDS FOR ENVIRONMENTAL EXCELLENCE

GUIDEBOOK FOR SHOPS AND RETAILERS SECTOR

(for SMEs)

2024

1. INTRODUCTION

1.1 Background

The Hong Kong Awards for Environmental Excellence (the HKAEE) is led by the Environmental Campaign Committee (ECC) alongside the Environment and Ecology Bureau and in conjunction with nine organisations, in alphabetical order, the Advisory Council on the Environment, the Business Environment Council, the Chinese General Chamber of Commerce, the Chinese Manufacturers' Association of Hong Kong, the Federation of Hong Kong Industries, the Hong Kong Chinese Importers' & Exporters' Association, the Hong Kong Council of Social Service, the Hong Kong General Chamber of Commerce and the Hong Kong Productivity Council. The HKAEE is an annual award which aims to encourage companies and organisations to adopt green management, benchmark their performance with the best practices within their sectors, and recognise the achievements of the best-performing companies and organisations.

As an environmental award that aims for excellence, the **HKAEE** takes the pyramidal shape as the form of its logo to show the commitment of different sectors of society for reaching excellence in environmental performance. At the apex of the logo is a tender leaf that symbolises the growth of environmental awareness in the community. The white ribbon that wraps around the pyramid forms the letter "Q" to represent both quality and qualified environmental performance of the awarded organisations.

1.2 Overview of 2024 HKAEE

The HKAEE has been recognised by the community as one of the most prestigious and reputable award schemes in Hong Kong. Information of this award scheme is summarised in the table below and full details can be found in the individual Guidebooks.

Table 1: Awards category under 2024 Hong Kong Awards for Environmental Excellence

The Organisers reserve the final right to make the final decision in the event of dispute over the eligibility of an applicant.

- ^ The nominated construction project should have at least one-third of the project work completed (according to the contract period) at the time of assessment.
- @ Hong Kong based manufacturing companies with their factories in the Greater Bay Area will also be eligible to join the HKAEE under the Manufacturing and Industrial Services Sector (for Non-SMEs), or Construction, Manufacturing and Industrial Services Sector (for SMEs).
- * Under the HKAEE, an SME is an organisation that (i) meets the definition of Small and Medium Enterprises (SMEs) adopted by the Government of the Hong Kong Special Administrative Region; (ii) has substantive business operation in Hong Kong; and (iii) its parent company or its affiliated company (if applicable) or itself should not be a listed company (ownership of a 50% of interest or more will be classified as an affiliated company). An SME under the definition of HKSAR Government is a manufacturing business which employs fewer than 100 persons in Hong Kong; or a non-manufacturing business which employs fewer than 50 persons in Hong Kong. The "number of persons employed" includes individual proprietors, partners and shareholders actively engaged in the work of the organisation; and salaried employees of the organisation, including full-time or part-time salaried personnel directly paid by the organisation, both permanent and temporary, at the time of submitting applications.

2024 Hong Kong Awards for Environmental Excellence

Awards Category

The awards to be granted in each of the sector:

or a combination as deemed appropriate by the Final Adjudicating Panel(s).

1.3 Objectives of the HKAEE for SMEs

The HKAEE for SMEs aims to:

- Encourage SMEs to implement environmental management;
- Measure organisations' performance and their commitment to environmental management within the industry; and
- Recognise organisations with excellent performance on environmental management.

1.4 Eligibility for the HKAEE for SMEs

All businesses / organisations and their functional units that (i) meet the definition of SMEs as adopted by the Hong Kong SAR Government, (ii) have substantive business operation in Hong Kong and (iii) its parent company or its affiliated company* (if applicable) or itself should not be a listed company are eligible to apply for the *SME*s sectors in the HKAEE. Functional units within an organisation can enter the same or separate sectors but each functional unit is limited to enter into one sector only. If an organisation has multiple functional units intending to join the same sector, each functional unit should demonstrate that it has its own environmental initiatives within its operation before being considered admissible to the HKAEE.

Definition of SMEs

An SME under the definition of HKSAR Government is a manufacturing business which employs fewer than 100 persons in Hong Kong; or a non-manufacturing business which employs fewer than 50 persons in Hong Kong. The "number of persons employed" includes individual proprietors, partners and shareholders actively engaged in the work of the organisation; and salaried employees of the organisation, including full-time or part-time salaried personnel directly paid by the organisation, both permanent and temporary, at the time of submitting applications.

To encourage wider participation, the Gold Award winner of each sector / sub-sector of the previous year will not be eligible for entering the HKAEE within the next **two** years. In other words, Gold Award winners of 2022 and 2023 HKAEE will not be eligible for entering 2024 HKAEE, and Gold Award winners of 2024 HKAEE will not be eligible for entering 2025 and 2026 HKAEE.

The Organisers reserve the right to determine the eligibility of any applicant.

^{*} Ownership of a 50% of interest or more will be classified as an affiliated company.

1.5 Eligibility for the Shops and Retailers Sector for SMEs

Business entities that meet the definition of SMEs above and have engaged in the retail sale of merchandise or retail services, mainly to the general public for personal or household consumption or utilisation are eligible to apply for the SME - Shops and Retailers Sector.

The Organisers reserve the right to determine the eligibility of any applicant.

1.6 Purpose of this Guidebook for Shops and Retailers Sector for SMEs

The purpose of this Guidebook is to explain the application procedures and assessment criteria for the Shops and Retailers Sector under the HKAEE for SMEs.

For reference, a general self-assessment checklist (Appendix 1) and sector best practices (Appendix 2) are provided to assist organisations in improving their environmental performance.

2. ASSESSMENT PROCESS

The assessment process for Shops and Retailers Sector is as follows:

Winners will be selected from a rigorous assessment process that comprises three stages:

Stage 1 - Initial Assessment

Upon receipt of the application form, eligible applicants will be invited to submit detailed information on their green policies and practices as well as environmental achievements via an online questionnaire. All information submitted by the applicants will be reviewed according to the assessment criteria of the awards. The Organisers may request additional documents for the purpose of information verification. The Organisers will then select applicants for detailed assessment in Stage 2.

All eligible applicants that have completed Stage 1 assessment and yet do not receive any award will receive a Participation Certificate after the completion of all assessment processes.

Stage 2 - Detailed Assessment

Organisations selected for detailed assessment will be visited by a team of assessors. The visit will include a tour of applicant's facilities and interviews with key representatives of the organisation including top management, department heads and general staff. The applicants should arrange the necessary permits and transportation between the Hong Kong-Shenzhen border and the premises in Mainland China, if necessary, for the assessment visit. During the site visit, applicants are encouraged to introduce their environmental performance to the assessors to provide them with an in-depth understanding of their environmental initiatives and the status of implementation.

The assessors will then prepare the assessment reports for submission to the Organisers for further short-listing into the final adjudication in Stage 3.

Applicants that have successfully completed Stage 2 assessment will receive a complimentary report on their environmental performance. The report will outline the organisation's strengths and highlight areas where improvements in environmental management could be made.

Stage 3 - Final Assessment

Adjudicating Panels will review the environmental performance of applicants. During the final assessment phase, the Adjudicating Panels may invite candidates to further present their achievements in a meeting. Each Adjudicating Panel will comprise representatives from various trade associations, government departments, professional bodies and the like.

3. ASSESSMENT CRITERIA

The assessment criteria for the SME – Shops and Retailers sector are based on the well-established "Eco-Business Model". This model is designed to exemplify the strong relationship between the internal operation of a business and the surrounding environment. The key factors, including *Green Leadership, Programme and Performance* and *Partner Synergy*, are generally considered to be vital in the overall integration of environmental measures within an organisation.

Eco-Business Model

Corporate Benefits

- Compliance with environmental requirements
- Cost savings
- Improved productivity and competitiveness
- Improved corporate image and customer recognition

Environmental and Community Benefits

- Increased environmental awareness
- Protection of finite resources
- Reduced pollution impacts
- Improved global environment
- Gained international recognition of Hong Kong's environmental efforts

The "Eco-Business Model" describes the key features that a green business should possess. It lists the criteria for becoming a successful "eco-business" and illustrates the benefits after fulfilling the criteria. If a commitment to environmental management is what you seek for your organisation, you should consider fulfilling the model criteria that are organised according to the following three key components.

On-going improvement is required to maintain high operational standards. Meeting the demands of clients while maintaining a commitment to environmental management can be made easy by following the three component criteria of the Eco-Business Model.

Each criterion focuses on a key aspect of environmental management. They explain to businesses the types of environmental measures that can be adopted, and how these measures can be put into practice. The following sections list the criteria of each component.

3.1 Green Leadership

The commitment from board of directors and senior management to environmental protection will steer the accomplishment of conservation measures taken within any business. This component of the Model suggests that management is to provide leadership in initiating the environmental measures to be taken. The efforts of senior management should involve formally defining the goals and policy of the company's commitment to environmental management, allocating resources to fulfil the requirements of the company's policy, communicating policy goals and involving all levels of staff in the programme. Furthermore, it is important that the senior management establishes channels to train staff members on how to practise environmentally friendly measures.

3.1.1 Leadership

In order to drive green culture within an organisation, commitment and participation of the management would encourage more staff to participate in green actions, hence achieving a greater success in environmental excellence. The greater extent of senior management commitment and participation to pursuing environmental management efforts within any business, the greater success of the environmental measures will be. Senior management should take the leading role in demonstrating their commitment to the company's environmental programme by getting involved in various environmental programmes and activities. In order to foster green culture within an organisation, the management is also recommended to encourage all staff members to participant various green activities to drive for greater success in environmental excellence.

3.1.2 Policy and Commitment

Top management should create an environmental policy that proclaims the commitment of the organisation to protecting the environment. An organisation's environmental policy is a statement of intent that is designed to outline how it will reduce environmental impacts and improve performance. An environmental policy should:

- Align with business mission and daily operation;
- Demonstrate commitment to adopting environmental practices to achieve continuous improvement, such as signing environment-related charters launched / supported by the Government (e.g. Carbon Reduction Charter, Waste Reduction and Recycling Charter, Carbon Neutrality (Waste Reduction) Charter, Food Wise Charter, Energy Saving Charter on Indoor Temperature, Energy Saving Charter on "No ILB", Use Less, Waste Less in My Hands, Waste Check Charter, Charter on Proper Operation of Refuse Collection Vehicles, Charter on External Lighting, Energy Saving Charter, 4T Charter, Glass Container Recycling Charter and Bye Bye Microbeads Charter);
- Comply with environmental legislation relating to the business operation; and
- Communicate and disclose to employees and stakeholders.

Selecting premises with green building certifications (such as BEAM Plus and LEED certifications) when deciding the location of the operation sites.

3.1.3 Organisation and Resources

Staff should be assigned with specific environmental responsibilities. Adequate human and financial resource should be allocated to ensure successful implementation of environmental initiatives within the organisation.

3.1.4 Environmental Communication

Environmental measures to be undertaken internally and externally are promoted among staff, customers, partners and the community. Effective promotion on the benefits of environmental management will encourage others to develop green initiatives and undertake measures themselves. The following approaches could further foster green culture among staff members:

- Establish incentives (e.g. certificates or gifts) to motivate staff members adopting environmental conservation measures through daily operations; and
- Nominate and encourage representatives to take part in Environmental Task Forces or environmental-related awards (e.g. HKAEE Outstanding Green Achiever Commendation Scheme).

3.1.5 Environmental Training

All relevant staff members should receive appropriate and adequate training to implement environmental measures within the organisation.

3.1.6 Managing for Continual Improvement

Regular checks should be undertaken to monitor the progress and review the overall effectiveness of measures taken (e.g. monitor the organisation's performance through establishing management systems such as ISO 14001 Environmental Management Systems). In addition, your company should benchmark your environmental performance with industrial / regional / global standards (e.g. obtain BEAM Plus and LEED certifications or benchmark your interior fit-out, renovation and refurbishment work with reference to the requirements of BEAM Plus Interiors) to manage for continual improvement.

3.2 Programme & Performance

3.2.1 Regulatory Compliance

Organisations should ensure that they are aware of all relevant environmental legislation by establishing suitable procedures for identifying such requirements and ensuring that key staff have the necessary knowledge to access this information. Each organisation should have its own list of relevant environmental requirements which it must comply with.

3.2.2 Environmental Programme Implementation

Once the management has demonstrated its commitment to environmental conservation measures, an environmental programme that defines the objectives, targets and schedule of various environmental initiatives can be formulated. Your environmental programme should be designed to meet your organisation's specific needs. Setting up your own environmental programme makes good business sense. Such a programme can streamline operations, cut costs, improve environmental performance and improve your image in the eyes of your staff, partners and the public.

The following outlines the approach you can take to create your own environmental programme(s):

- ** Understand Your Needs Carry out an environmental review to determine the status of your organisation in relation to protection of the environment (the Self-Assessment Checklist for Shops and Retailers in Appendix 1 can be a starting point). The checklist is designed to help identify the strengths and weaknesses of your organisation and assist you in prioritising the actions that you need to take.
- **Define Your Objectives** Once you have identified the key areas that need improvement, you can priorities the areas that you intend to make improvement.
- **Define Your Targets** According to the objectives, define specific, practicable and measurable targets for implementation.

- Formulate Your Action Plan Formulate in detail the measures that will be taken to achieve the targets and the implementation timeframe. At the same time determine the staff representatives for undertaking different measures.
- Monitor Your Programme Keep track of the progress of the programme defined.
- * Review the Results Review monitoring data to identify room for improvements.

Now you understand how to develop environmental programmes within your company, you can begin to determine the measures that suit yours.

3.2.3 Energy Conservation and Progressing towards Carbon Neutral

Energy conservation is fundamental for environmental programme. Electricity is the main form of energy used and major source of carbon emission in Hong Kong. In Hong Kong, electricity is primarily generated through the combustion of coal and gas. Both coal and gas are natural resources, and they will eventually run out. Furthermore, coal burning results in air pollution. Actions to reduce electricity consumption can help preserve natural resources. Many measures can be taken to reduce the use of energy and progress towards carbon neutral in your establishment, most of which are simple yet effective practices that require minimal time and effort. For example,

- Review energy bills to find out the amount of energy consumed on an annual or monthly basis;
- Determine the main sources of energy usage or energy loss (e.g. energy loss due to an opened window in an air-conditioned building);
- Establish energy reduction plans and targets for your organisation as well as for different energy consuming components (e.g. set an annual reduction target of 10% on the overall energy consumption, and a 30% reduction target on the amount of energy consumed by your air conditioning system); and
- Purchase carbon offsets to offset the carbon emissions related to business operations.

Lighting and equipment

- Use energy-saving lightings such as LED lights.
- De-lamp unnecessary lightings and encourage the use of natural lighting where possible.
- Use energy-efficient equipment with Grade 1 or 2 Energy Label issued by the Electrical and Mechanical Services Department (EMSD) or equivalent.
- Adopt demand-side management initiatives by programming the lighting control systems and ventilation systems to avoid excessive use during non-business hours.
- Install timers or occupancy sensors in low traffic area so that lights are turned off when not in use.
- Consider turning off a portion of office lights during lunch breaks, during overtime work and after normal office hours.
- Switch off lighting installations of decorative, promotional or advertising purposes during the preset time (i.e. 11 p.m. or midnight to 7 a.m. on the following day).

Ventilation and temperature control

- Set temperature of all air conditioner(s) at 24 to 26°C.
- Post reminder signs to remind staff members to turn off lights / air-conditioners when not in use.
- Establish an inspection and maintenance programme to ensure all air conditioning / ventilation equipment are operating efficiently and dust filters are cleaned regularly.
- Use fans to reduce air condition load.
- Use blinds or curtains to deflect the heat of the sun (to reduce air conditioning loading) during summertime and open them to allow in heat from the sun during colder months.
- Y Keep all windows and outside doors closed when air conditioning units are running if appropriate.

3.2.4 Waste Management

All business operations inevitably generate waste. A holistic Waste Management Plan could be compiled to manage the waste issues of the organisation. You can place waste collection boxes for paper, plastics, metals, packaging materials and / or other recyclables in your establishment to facilitate source separation of waste for recycling.

Reduce – General

- Avoid unnecessary / excessive packaging.
- Sealing packages Minimise the amount of tape strapping and shrink-wrap used.
- Provide an option to the customers for not receiving the printed copy of receipt (e.g. e-receipt).
- Avoid handing out paper flyers, instead post advertisements over the Internet, in newspapers, on billboards and on television.
- Use reusable shipping crates in place of cartons.
- Choose proper sized packages to pack goods and avoid using an excess number of fillers.
- Handle and store materials carefully to reduce breakage and spills.
- Rent pallets to transport merchandise to your stores instead of purchasing new ones.
- Encourage the use of staff bulletin board or e-mail for both internal and external communication, or if this is not possible, circulate material rather than making copies for individuals.
- Choose solar powered appliances such as calculators to avoid battery disposal.
- Follow "first in, first out" principle to minimise wastage or over-order of stocks.

Reduce - In the pantry

- Encourage staff to buy or bring their own lunch in reusable containers.
- Use reusable (not paper) cutlery, dishes, cups and coffee filters wherever possible.
- Use refillable containers for cleaning products.
- Fincourage staff members to use hand towels instead of paper towel.

Reuse

- Reuse the boxes and bags for delivering products.
- Use shredded wastepaper for packaging.
- Offer your unused boxes and pallets back to your suppliers for reuse.
- Establish a collection bin for used packaging materials that can be reused.
- Choose renewable resources, sustainable or recycled materials for packaging of goods.
- Reuse envelopes by attaching new labels on them.
- Encourage customers to bring their own shopping bags and bottles / containers for product refill services (if applicable) by provision of incentives (e.g. a small discount, gift redemption).

Recycle / Upcycle

- Upcycling waste products into other useful products.
- Ask suppliers about the possibility of returning used products and if possible return used corrugated cardboard, paper boxes and shrink-wrap to them.
- Return appliances to suppliers that are no longer of use, or donate them to an appliance refurbishment organisation.
- Ye Liaise with cleaning staff and encourage them to help in the source separation of waste programme.
- Establish waste collection boxes for paper, plastics, metals and / or other recyclables in your establishment to enhance source separation of waste for recycling.

- Set up a return or refill programme for items that can be reused or refilled within your establishment. For example, some cosmetic containers can easily be refilled many times before they are discarded.
- Cooperate with suppliers to run take-back / trade-in programme for products which will cause significant environmental impacts (e.g. electrical and electronic equipment).
- Participate in the development of a community-recycling programme.

3.2.5 Housekeeping

The general appearance of your retail establishment is a key factor to attract customers. It is therefore important to create a pleasant atmosphere in your establishment by ensuring that your facilities are well maintained. Furthermore, the ways you handle and store your products will also affect your establishment's work environment. Some of the products that you use and sell on a daily basis have the potential to cause harm to your staff, customers and the environment if they are not handled and stored properly.

3.2.6 Indoor Air Quality / Odour Control

The air inside buildings can contain numerous airborne pollutants. Pollutants including toxic chemicals, dust, mites, bacteria, fungal spores and viruses are commonly detected in enclosed indoor environments. Many stockrooms and retail stores in Hong Kong are located inside insufficiently ventilated buildings or malls that receive outside air passing through air conditioning system and circulating around the establishment.

Although the air can be contaminated through outside influences in some cases, air conditioning systems are the culprit behind contamination if they are not properly maintained. Other nuisances that contribute to indoor air pollution within stockrooms and retail stores include chemicals generated from new furniture, carpet, renovation work, smoke, dust from unclean furniture and, equipment as well as pollutants produced by machinery. In some instances, poor air circulation can result in a build-up of carbon dioxide levels causing discomfort. Other air pollutants including smoke, dust, ozone and air-borne bacteria can cause a wide array of human health problems when inhaled. There are a number of measures can be taken to improve indoor air quality within your stockrooms and / or retail stores.

- Check with your facilities management if there is sufficient fresh air supplied to the building.
- Ensure that the inlet of fresh air supply is not located near outdoor air pollution sources (e.g. chimney exhaust from an adjacent building).
- Ensure that air outlets, ducts, filters and cooling coils within air-conditioning systems are cleaned and, if necessary, replaced on a regular basis.
- Clean the carpet and upholsteries on a regular basis.
- Photocopiers generate ozone during operation and therefore it is important that you allocate these machines in ventilated areas.
- Use electric forklifts in the stockrooms (if applicable) to avoid pollutant emissions.
- During renovation, avoid plywood and particle board, which usually contain formaldehyde-based adhesives during sets productions; use no-VOC or low-VOC paints, sealants, lacquers, plant-based paint strippers, solvent-free caulk and adhesives; avoid spray paint.

3.2.7 Transportation

In Hong Kong air pollution can be largely attributed to motor vehicle use, power station emissions and transboundary sources. Road vehicles in Hong Kong are usually powered by fossil fuel. The combustion of fuel in car engines results in the release of air pollution particles. Inhaling these particles is proven to cause respiratory diseases such as asthma and bronchitis. Furthermore, these air pollutants also contribute to global warming and acid rain. As more and more motor vehicles drive on Hong Kong streets, the air pollution situation worsens. However, we can help to reduce air pollution by switching to alternative forms of travel.

Ways to improve Transport Efficiency within your establishment

- Encourage staff and customers to use public transport or to walk to work whenever possible. In your advertisements you can supply information regarding public transport options customers can take to get to your store.
- If parking facilities are available at your establishment encourage staff to carpool.

Ways to improve Transport Efficiency if you operate a vehicle fleet

- Establish a vehicle maintenance programme to ensure that vehicles are well maintained.
- Encourage the manager of your vehicle fleet or contractors to purchase environmentally preferable vehicles. Vehicles that are meeting higher emission standards (e.g. Euro-VI) are readily available. Furthermore, vehicles powered on natural gas or propane produce even fewer emissions. Hybrid or electric vehicles can also be good substitutes.
- Encourage the manager of your vehicle fleet to determine the most efficient transport routes and avoid making individual trips. Encourage the delivery of materials during non-peak traffic hours.
- Ensure the drivers comply with the Motor Vehicle Idling (Fixed Penalty) Ordinance (Cap 611).

3.2.8 Green Procurement

You can contribute to environmental protection by incorporating environmental considerations into the planning and management of all activities involved in sourcing and procurement, conversion, and all logistics management activities (also including coordination and collaboration with suppliers, intermediaries, third-party service providers and customers) that will result in a reduction of pollution.

Every product that you purchase for your establishment (whether it is used by staff or for sale to customers) or logistic arrangement for the delivery of products from suppliers to end customers (may involve the stockrooms / warehouses), has the impact on the environment.

Taking purchase of goods as an example, you can reduce the amount of waste that you produce through making careful decisions. Products that are biodegrade, can be fashioned into new items or may even be reused several times before they are disposed of, will reduce stress on landfills.

General rules for environmentally responsible product purchasing

Encourage the purchase of products (including goods, materials and / or services) that meet as many of the following criteria as possible:

- Purchase goods / materials products that are reusable or contain reusable parts such as refillable pens and rechargeable batteries.
- Buy goods / materials that can be recycled, such as uncoated paper bags that can be easily recycled.
- Buy products that reduce the use of resources. For example, energy efficient light fixtures should be purchased over less energy efficient options.
- Select durable goods / materials to avoid constant replacement.

- *Choose to purchase products with no or low toxicity such as low-pollution water-based paint. Using these types of products will also help to reduce safety hazards in the workplace.
- Choose service providers or contractors that use goods / materials complying with legal and company's environmental requirements.
- Strive to purchase merchandise that is environmentally preferable so that your customers have the option of buying such goods / materials.
- Adopt green menus at company annual dinner / events.
- Make reference to the green specifications published by the Environmental Protection Department or other green procurement guidelines when practicing green procurement.

Purchasing procedures

- Purchase products that are environmentally friendly. If your organisation does not have any policy guiding the purchase of products, you should consider designing one that favours purchasing environmentally preferable products. This policy should be made known to suppliers.
- Conduct simple research into heavily used items within your establishment (e.g. paper products and plastic bags) that could be substituted by other more environmentally preferable alternatives.
- Examine the possibility of repairing items instead of purchasing new ones. In many instances furniture can be refurbished for a fraction of the cost of purchasing new items.
- Encourage colleagues to suggest products that are known to be more environmentally preferable than what you are currently using.
- Encourage ethical purchasing, the practice of avoiding products that have been created as a result of environmental degradation. For example, purchase cruelty free products, do not buy products that have been manufactured out of rainforest wood since the destruction of these forests contribute to many environmental problems including global warming, deforestation, biodiversity loss and more.
- Buy goods in bulk quantities.
- Stop / Avoid purchasing disposable and microplastic-containing product.
- Support the purchase of products that bear environmentally friendly logos or eco-labels.

3.3 Partner Synergy

3.3.1 Communication and Motivation

Once you have committed to environmental conservation measures within your organisation, you should share with others. Your suppliers, contractors, customers and other business partners deserve to learn about the positive actions that you are now taking. Knowledge of your environmental programme is valuable to others since seeing your accomplishments can motivate them to establish their own programmes. In some instances, your partners may not be aware of the benefits of establishing such a programme. In other instances, they may be interested in starting up their own programmes, yet they need some initial guidance as to how to begin. It is therefore important that your policy is made known to interested parties. By assuming a proactive stance, you will encourage others to learn about environmental protection and give your organisation more exposure within the business world. Publishing an environmental report or sustainability report is a good form of communication with your stakeholders.

Influence your Suppliers / Contractors

A sound environmental programme will demand that you purchase and use environmentally preferable products whenever possible. Therefore, it is important that your suppliers and other relevant partners are made aware of your programme requirements and are capable of meeting your needs. There are a number of activities that you can undertake to clearly communicate your requirements to your suppliers.

- You should inform suppliers of your environmental policy and provide them with your mission statement.
- State environmental requirements in tender documents.
- Work with suppliers to help capture the type of products that you seek at a competitive price. Ask your suppliers to identify environmentally preferable products that can substitute those you are currently using (at a comparable price).
- Encourage suppliers to provide you with documentation that guarantees the 'environmentally preferable' authenticity of the products that you are purchasing.
- Fincourage suppliers to use recyclable / biodegradable packaging materials.
- Invite your suppliers / contractors to participate in any community support programme(s) or environmental partnership programme(s) with the public / private sector / NGOs.

Influence your Customers

Just as you appreciate your suppliers for providing you with various environmentally preferable products, your customers will appreciate your efforts in offering them with quality goods / materials. In general, by communicating the message that you are environmentally responsible you can increase customer loyalty. It is therefore a good practice to supply your customers with information regarding the environmental measures that you are taking and the nature of the products they are purchasing.

- Post your environmental policy in a prominent place within your establishments.
- Ye Listen to your customers when they identify those areas requiring improvement and how you could be of help.
- Encourage customers to share their comments regarding the environmentally preferable products that you offer as well as suggest any products that they may wish for you to sell.
- Label goods / materials that are recycled, can be reused or are not harmful to the environment.
- Post information regarding the products on signs in front of each display.
- Fincourage customers to bring their own bags to reduce the use of plastic bags and shopping bags.
- Offer incentive programmes to encourage customers to return used product containers in exchange of free gifts or extra membership points.
- Encourage customers to choose products / materials that have incorporated green considerations.

In general, by communicating the message that you are environmentally responsible, you can increase customer loyalty.

Influence on the Community

Everyone in Hong Kong experiences the effects of pollution. Many people would like to help improve environmental quality, however, not everyone knows how to get involved. As a "green" business operator, you deal with environmental management issues on a daily basis. You are in a strong position to help the community to implement green measures. It is important for you to understand the impact of your business and environmental actions and communicate your impact to the society. You should also act as a role model to demonstrate your effort in environmental protection. By helping your community, in return you can gain satisfaction through knowing that your efforts can improve the environment and give you good standing within the community.

Furthermore, taking simple initiatives including efforts to report the lessons that you have learnt in setting up your programme(s) and other useful information can help in raising community awareness. There are a number of ways that you can get involved.

- Motivate staff members and stakeholders to support and participate in various community activities (i.e. tree planting, beach clean-up, barters, carbon reduction programmes and biodiversity conservation programmes, etc.).
- Set up donation boxes and give proceeds to local environmental charities.
- Report your environmental initiatives and achievements in newsletter, sustainability reports and other publications.
- Apply for awards or labels to gain formalised recognition for your efforts.
- Support, sponsor and / or collaborate with non-government organisation (NGOs) to promote environmental protection, such as participating in recycling programmes, supporting food donation schemes, etc.

4. WEIGHTINGS OF ASSESSMENT CRITERIA

As mentioned in Section 3 above, the assessment of eligible entries under the Shops and Retailers sector comprises three criteria, namely, *Green Leadership, Programme and Performance* and *Partner Synergy*. Specific to this sector, the weighting of each of the assessment criteria is as follows:

Green Leadership	Programme and Performance	Partner Synergy
25%	45%	30%

In order to recognise applicants' efforts to promote in the *HKAEE* as well as their achievements in the Hong Kong Green Organisation Certification (HKGOC) and other recognised certification or award schemes, a maximum of 10 bonus points will be given to the applicants during Stage 2 assessment of the *HKAEE*, as follows:

Bonus Points Awarded for Efforts in Promoting HKAEE (maximum 3 bonus points)

- Applicants who have promoted HKAEE through their business network and / or promotional channels / platforms (e.g. display the awarded logos and stickers in premises, website and electronic screens, etc.; imprint the awarded logo in name cards, letterhead; and publish featured articles through media) will earn a maximum of 1 bonus point.
- Applicants who have successfully referred their business partners (e.g. suppliers) to join the HKAEE will earn a maximum of 2 bonus points.

Applicants who have promoted HKAEE through their business network and successfully referred their business partners may also be awarded with the title of "Outstanding HKAEE Promotional Partner" if they have fulfilled certain criteria, please refer to Section 2.6 of 2024 HKAEE Programme Booklet for details.

Bonus Points Awarded for Achievements in Hong Kong Green Organisation Certification (HKGOC) (maximum 4 bonus points)

Applicants who possess valid Wastewi\$e / Energywi\$e / IAQwi\$e / Carbon Reduction Certificate / recognition of Hong Kong Green Organisation will earn 1 bonus point per Certificate / recognition.

Bonus Points Awarded for Efforts in Other Schemes (maximum 3 bonus points)

Applicants who possess a valid certificate from environmental schemes such as ISO 14001, ISO 20121, ISO 50001, IECQ HSPM QC 080000, Hong Kong - Guangdong Cleaner Production Partners (Manufacturing) Recognition Scheme, Hong Kong Green Mark Certification Scheme, WWF-Hong Kong's Low-carbon Operation Programme (LOOP^{PLUS}) and Low Carbon Manufacturing Programme (LCMP), CLP Smart Energy Award, WGO's Green Office Awards Labelling Scheme (GOALS), FHKI's BOCHK Corporate Low-Carbon Environmental Leadership Awards, BEAM Plus New Buildings / BEAM Plus Existing Buildings / BEAM Plus Interiors, Hong Kong Green Shop Alliance Award, EEB's Charter on External Lighting or other schemes recognised by the Organisers will earn 1 bonus point. The Organisers reserve the right to grant bonus points to any applicants.

*Note:

- 1. HKGOC consists of four Certificates, namely "Wastewi\$e Certificate", "Energywi\$e Certificate", "IAQwi\$e Certificate" and "Carbon Reduction Certificate". Participants can further obtain the recognition of "Hong Kong Green Organisation" by demonstrating the environmental practices in multiple aspects. Please refer to the HKGOC programme booklet for details.
- 2. ISO 14001 is an environmental management system standard published by the International Organization for Standardization.
- 3. ISO 50001 is an energy management system standard published by the International Organization for Standardization.
- 4. ISO 20121 is an event sustainability management system standard published by the International Organization for Standardization.
- 5. IECQ HSPM QC 080000 is a standard on hazardous substances process management published by the IEC Quality Assessment System for Electronic Components.
- 6. Hong Kong Guangdong Cleaner Production Partners (Manufacturing) Recognition Scheme is jointly operated by the Environment and Ecology Bureau of the Government of the HKSAR and the Department of Industry and Information Technology of Guangdong Province.
- 7. Hong Kong Green Mark Certification Scheme is a system certification scheme operated by the Hong Kong Q-Mark Council, Federation of the Hong Kong Industries
- 8. Low-carbon Operation Programme and Low Carbon Manufacturing Programme are schemes operated by WWF-Hong Kong. The bonus point will only be granted to applicants in applicable Sectors for their operations in Hong Kong or Greater Bay Area (only applicable to Manufacturing and Industrial Services sector (for non-SMEs) or Construction Manufacturing and Industrial Services sector (for SMEs)).
- 9. CLP Smart Energy Award is organised by CLP Power Hong Kong Limited which aims to recognise organisations who have implemented energy conservation measures and achieved outstanding energy saving results.
- 10. Green Office Awards Labelling Scheme (GOALS) is a recognition scheme for offices organised by the World Green Organisation (WGO).
- 11. BOCHK Corporate Low-Carbon Environmental Leadership Awards is organised by the Federation of Hong Kong Industries, which aims to promote environmental practices among the manufacturing and services enterprises in Hong Kong and the Pan Pearl River Delta (PRD) region.
- 12. BEAM Plus is an independent assessment of building sustainability performance. It is certified by Hong Kong Green Building Council Limited (HKGBC) while the assessment is handled by the BEAM Society Limited.
- 13. Hong Kong Green Shop Alliance Award is organised by the Hong Kong Green Building Council, which aims to foster green shopping environment in Hong Kong. Only winners of the main awards, i.e. "Best Green Practice in Malls", "Best Green Practice in Shops" and "Best Collaborative Effort of Malls and Shops" can earn bonus point in HKAEE.
- 14. Charter on External Lighting is a voluntary scheme implemented by EEB to invite owners and responsible persons of external lighting installations to switch off lighting installations of decorative, promotional or advertising purposes which affect the outdoor environment during the preset time (i.e. 10 p.m., 11 p.m. or midnight to 7 a.m. on the following day) to foster a better nighttime environment, which is conducive for the public to rest and energy saving.
- 15. The presentation of the award to any winning organisation is still subject to further consideration of non-compliance record of environmental regulations, if any, before the date of the Presentation Ceremony.

5. APPLICATION FORM (SHOPS and RETAILERS SECTOR - SMEs)

SECTION 1 - Organisation Profile

Application Deadline: 14 Jan 2025

(Please note that the Name of Organisation indicated below refers to "the entity of application", which will be used in the award and publicity and cannot be changed without justifiable reasons.)

Name of Organisation	on (holding a valid Hong	Kong Business Registration Certificate or other legal entities):
in English:		
in Chinese:		
Address:		
Telephone:		
Website:		
Description of		
Core Business:		
BR Number:		
Name of Functional	Unit, if applicable:	
in English:		
in Chinese:		
Address:		
	npany / Affiliated Compa	ny, if applicable:
in English:		
in Chinese:		
Number of emplove	es (under the Business R	egistration of the applicant organisation)
Hong Kong:	75 H.C. X	(Part time)
Parent Company:	(F. H.C.)	(Part time)
Is your company or i	ts parent company / affi	liated company (if applicable) a listed company?
□ Yes		□No

SECTION 2 - Contact Details and Declaration

Please provide the following information about t	ne contact person of your organisation.
Name of Contact Person:	
Designation:	
Telephone:	
E-mail:	
Postal Address:	
(If different from Section 1)	
Please read the consent statement below before	signing and submitting this application form.
Signature:	
(with Organisation Chop)	Date:
Name of Signatory	Designation:

The HKAEE Technical Consultant (Hong Kong Productivity Council, HKPC) has adopted a Personal Data (Privacy) Policy. You may contact HKAEE Technical Consultant to request access to, and amend your personal data provided by you. If needed, please send an email to: sec@hkaee.gov.hk. The personal data collected from you will be erased and destroyed after 24 months upon the completion of the assessment of HKAEE.

CONSENT STATEMENT

I hereby declare that the information given above is accurate to the best of my knowledge, and agree that all decisions made by the Organisers (i.e. Environment and Ecology Bureau and Environmental Campaign Committee and its Secretariat) and adjudicating panels are final and binding in all aspects relating to the HKAEE. I understand that any false or misleading information may lead to disqualification of my application.

I agree that personal data (including name, phone number, correspondence address and email address) provided by me will be used for the purpose of the communication, administration, evaluation and management of my application. I understand if I cannot provide the relevant personal data, processing of my application by the Organisers and the Technical Consultant may be affected.

The HKAEE Technical Consultant (Hong Kong Productivity Council, HKPC) intends to use the personal data (including your name, phone number, correspondence address and email address) that you have provided to promote the latest development, consultancy services, events and training courses of HKPC. Should you find such use of your personal data unacceptable, please indicate your objection by ticking the box below.

□ I object to the proposed use of my personal data in any marketing activities arranged by HKAEE Technical Consultant (HKPC).

The Environment and Ecology Bureau and / or the Environmental Campaign Committee and its Secretariat also intend to use the personal data (including your name, phone number, correspondence address and email address) that you have provided to promote the latest development, policies, activities and schemes of the Environment and Ecology Bureau and / or the Environmental Campaign Committee. Should you find such use of your personal data unacceptable, please indicate your objection by ticking the box below.

I object to the proposed use of my personal data in any marketing activities arranged by the Environment and Ecology Bureau and / or the Environmental Campaign Committee and its Secretariat.

Appendix 1 – Self Assessment Checklist for the Shops and Retailers Sector (for SMEs)

GREEN LEADERSHIP

		Yes	No
Le	adership		
>	Demonstrate commitment from management.		
>	Involve management in the environmental programme and activities.		
>	Communicate with employees in a two-way manner.		
>	Establish incentives by management to encourage the employees to practise		
	green measures.		
Po	licy and Commitment		
>	Establish an environmental / sustainability / ESG policy.		
	Contain commitment to environmental conservation in the environmental / sustainability / ESG policy.		
>	Apply the environmental / sustainability / ESG policy company-wide.		
\	Direct the stated aims and objectives of the policy towards the organisation's activities and procedures.		
\	Select premises with green building certifications (such as BEAM Plus and LEED certifications) when deciding the location of your shop.		
>	Sign environment-related charters launched / supported by the Hong Kong SAR Government. (e.g. Carbon Reduction Charter, Waste Reduction and Recycling Charter, Carbon Neutrality (Waste Reduction) Charter, Food Wise Charter, Energy Saving Charter on Indoor Temperature, Energy Saving Charter on "No ILB", Use Less, Waste Less in My Hands, Waste Check Charter, Charter on Proper Operation of Refuse Collection Vehicles, Charter on External Lighting, Energy Saving Charter, 4T Charter, Glass Container Recycling Charter and Bye Bye Microbeads Charter).		
Or	ganisation and Resources		
\	Appoint a "Green Manager" to coordinate the environmental programme.		
\	Establish an Environmental Task Force to steer and facilitate the environmental programme implementation.		
\	Allocate sufficient resources for environmental programme implementation.		
	Encourage staff involvement in the environmental programme.		
\	Establish and operate a sound environmental management system.		
En	vironmental Communication		
\	Publicise the environmental / sustainability / ESG policy, initiatives and accomplishments from time to time.		
>	Encourage staff to give suggestions or feedback to the environmental programme.		

		Yes	No
>	Collect staff's ideas and answer colleagues' questions or concerns.		
>	Offer incentives or rewards to staff for their environmental initiatives.		
\	Communicate the accomplishments of the environmental programme to the community.		
En	vironmental Training		
λ	Define environmental training needs and provide appropriate environmental training for individual staff.		
	Maintain environmental training records.		
Mā	anaging for Continual Improvement		
\	Devise a simple plan to schedule regular checks of the organisation's environmental programme.		
\	Document the findings of the checking properly and implement any corrective actions arising from the checking.		
>	Monitor if appropriate corrective actions are taken and to address any lapses or inadequacies.		
A	Benchmark environmental performance with industrial / regional / global standards (e.g. obtain BEAM Plus, LEED certifications or benchmark your interior fit-out, renovation and refurbishment work with reference to the requirements of BEAM Plus Interiors).		

PROGRAMME AND PERFORMANCE

		Yes	No
Reg	gulatory Compliance		
>	Identify and collect legal information from corporate sources, relevant		
	government authorities and industry associations.		
>	Establish a register of environmental requirements relevant to your operation		
	based on the information collected.		
>	Establish a procedure to ensure that relevant staff members have continuous		
	access to the legal requirements.		
>	Establish a procedure to ensure relevant information on legal requirements		
	is communicated to staff effectively.		
>	Establish a procedure to keep track of changes to environmental		
	requirements and to update the environmental requirements accordingly.		
>	Monitor the status of compliance with environmental requirements regularly.		
\	Take appropriate corrective and preventive actions for areas of regular,		
	repeated or significant non-compliance.		
Env	vironmental Programme Implementation		
>	Carry out an environmental review to determine areas requiring		
	improvement.		

_		Yes	No
λ	Define your environment objectives and targets.		
\triangleright	Formulate measures to achieve objectives and targets.		
\triangleright	Appoint staff to be responsible for undertaking different measures.		
\triangleright	Review the outcome of environmental programme and find ways for		
	improvement.		
Ene	ergy Conservation and Progressing towards Carbon Neutral		
Gei	neral		
λ	Review energy bills regularly.		
>	Conduct energy and / or carbon audit to find out the main sources of energy		
	usage and carbon emissions, and identify the improvement areas.		
>	Establish an energy / carbon reduction target.		
>	Set up and implement procedures to reduce energy consumption / carbon emission.		
\triangleright	Purchase carbon offsets to offset the carbon emissions related to business		
	operations.		
Lig	ht and equipment		
\triangleright	Use energy-saving lightings such as LED lights.		
\triangleright	Turn off a portion of lights during lunch hour, overtime work and after		
	normal operating hours.		
λ	Install timers or occupancy sensors so that lights are turned off when not in		
	use.		
>	Apply lighting zone control to enable switching on / off lighting		
	independently in different parts of the office.		
A	Adjust the lighting levels appropriately and reduce excess lighting (e.g. delamping).		
>	Encourage the use of natural lighting.		
λ	Turn off electronic equipment when not in use.		
\	Use timers on electronic equipment to ensure that they are turned off after work hours.		
>	Use electronic ballasts to replace conventional electromagnetic ballasts		
	where possible.		
>	Select products that are more energy efficient during the purchase of new		
	appliances.		
>	Post signs on electric and electronic appliances to remind people to turn off		
	the equipment when not in use.		
Ver	ntilation and temperature control		
\	Install timers or computer controls to turn off air-conditioning system.		
A	Establish a maintenance programme on air-conditioning / ventilation systems.		

_		Yes	No
>	Check room temperatures regularly to determine if controls are properly set		
	to maintain temperature at 24-26°C.		
	Use blinds or curtains to deflect the heat of the sun in summer and draw		
	blinds or curtains to allow in heat from the sun during colder months.		
A	Keep windows and doors closed when air-conditioning units are running.		
A	Encourage your building manager to turn off air-conditioning systems after		
	normal office hours.		
A	Use fans to enhance cooling effect and reduce the use of air conditioners.		
A	Select uniforms (if required) according to the season and job requirements		
	so as to reduce the demand for air-conditioning.		
Wa	nste Management		
\wedge	Review types and quantities of waste disposed of and define reduction		
	target(s).		
>	Use double-sided photocopying.		
>	Encourage the use of E-mail for both internal and external communication.		
>	Adopt an e-fax system to reduce the use of fax paper and save printing		
	supplies.		
>	Streamline operation procedures and eliminate unnecessary forms / records.		
>	Provide an option to the customers for not receiving the printed copy of		
	receipt (e.g. e-receipt).		
λ	Avoid photocopying faxed documents unless required.		
A	Avoid handling excessive paper flyers.		
A	Avoid unnecessary packaging.		
A	Minimise the use of tape and strapping when sealing packages.		
	Choose proper sized packages and avoid using fillers in packaging.		
>	Avoid breakage and spillage of materials when handling for resource		
	conservation and to minimise wastage.		
>	Keep reusable cloth rags on hand to wipe up spills.		
	Choose solar powered appliances to avoid battery disposal.		
>	Encourage staff to use re-useable containers, dishes, cups and coffee filters		
	in the pantry wherever possible.		
>	Use refillable containers where possible.		
>	Use shredded wastepaper for packaging.		
>	Reuse envelopes by attaching new labels to them or any other means.		
>	Reuse the boxes you receive from your suppliers for storing materials or		
ĺ _	delivering products to your customers.		
>	Adopt reusable carriers for goods distribution.		
>	Offer your unused boxes back to the supplier for reuse.		
>	Establish collection bins for used packaging, cord binding, envelopes and		
	other materials that can be reused.		

		Yes	No
>	Establish wastepaper recycling boxes for individual workstation.		
>	Encourage wastepaper separation within your establishment.		
>	Return used products, corrugated cardboard, paper boxes and shrink-wrap		
	to suppliers if possible.		
\	Procure refillable pens, re-chargeable batteries to reduce waste generation.		
	Recycle or upcycle used materials as far as possible.		
>	Participate in community recycling programme.		
λ	Educate cleaning staff for proper and clean recycling.		
>	Provide separate collection facilities for different recyclable materials to		
	encourage source separation.		
λ	Reduce and reuse festive / promotional decorations.		
	Avoid the use of bottled water and unnecessary decorations / souvenirs at		
	official events.		
	Establish take-back system for packaging containers.		
>	Place the recyclable waste collection facilities at easily accessible location.		
>	Store and dispose harmful wastes appropriately.		
Но	usekeeping		
>	Establish an orderly and clean store environment.		
>	Always use the 'First-In-First-Out' principle to avoid expiry of material.		
>	Post signs to inform employees of good practices for handling and storing		
	materials.		
>	Designate an area to store potentially harmful substances to prevent leakage		
	to the environment.		
>	Employ a licensed chemical waste collector to collect and dispose of		
	chemical wastes.		
	Ensure that chemical wastes generated are properly labelled, packaged and		
	temporarily stored in a designated chemical waste storage area.		
>	Ensure that storage is in accordance with the Environmental Protection		
	Department's Code of Practice on the Packaging, Handling and Storage of		
	Chemicals.		
>	Keep an inventory of the substances that are potentially harmful to the		
	environment.		
>	Exercise procedures during the handling and storing of potentially harmful		
	substances to prevent leakage to the environment.		
Air	Pollution / Odour Control		
>	Instruct contractors to follow regulations on the use of refrigerants in the air-		
	conditioning systems.		
>	Locate odour generating sources far away from occupants or consider		
	installing odour control devices.		

		Yes	No
Ina	loor Air Quality		
\triangleright	Monitor that there is sufficient fresh air within the building.		
\triangleright	Ensure that the venting facilities of the establishment are not located near		
	outdoor air pollution sources.		
\triangleright	Clean the air outlets, ducts, filters and cooling coils the air-conditioning		
	system regularly.		
A	Clean carpet and upholsteries regularly.		
A	Place photocopier and laser printers in properly ventilated areas.		
\	Report any air pollution nuisance from outside sources to EPD.		
\triangleright	Grow plants in the office.		
>	Instruct contractors to use materials contain low volatile organic compound		
	(VOCs) during renovation.		
\triangleright	Obtain Certification to IAQ for premises.		
Tra	nsport and Logistic Efficiency		
>	Encourage staff and customers to use public transport or walk to work		
	whenever possible.		
>	Encourage staff and customers to carpool if parking facilities are available.		
\	Encourage purchase of hybrid / electric vehicles.		
>	Encourage all company drivers to use the most efficient transport routes.		
>	Encourage delivery of materials during non-peak traffic hours.		
>	Purchase vehicles that are meeting higher emission standard (e.g. Euro-VI)		
	or environmentally friendly.		
\triangleright	Ensure the drivers comply with the Motor Vehicle Idling (Fixed Penalty)		
	Ordinance (Cap 611).		
Gre	een Procurement		
\triangleright	Purchase environmentally friendly products such as products that are		
	reusable, recyclable, contain reusable parts, use minimal resources, are		
	designed to last for longer time periods and contain fewer toxic pollutants.		
	(e.g. recycled paper, recycled toner cartridges).		
>	Establish a guiding policy that favours staff purchase of environmentally		
	friendly products.		
>	Encourage staff to examine the possibility of repairing items instead of		
	purchasing new ones.		
>	Encourage ethical purchasing (the practice of avoiding products that would		
	bring adverse effect to the ecosystem and society).		
>	Buy goods in bulk quantities.		
>	Adopt green menus at official events.		
>	Support the purchase of products that bear environmentally friendly logos or eco-labels.		

PARTNER SYNERGY

_		Yes	No
Cu	stomers' Needs		
	Communicate regularly with customers.		
	Find out about customers' environmental needs.		
>	Pay attention to environmental needs of customers and provide		
	environmentally friendly products (such as energy-saving bulbs and, low		
	formaldehyde furniture) to customers.		
Cu	stomers' Support		
>	Involve customers in the planning and implementation of environmental		
	programmes.		
>	Organise environmental activities for customers.		
>	Seek customers' support of environmental activities.		
En	couragement and Motivation of Customers		
>	Encourage participation of customers.		
>	Look for opportunities to praise participants.		
>	Provide supportive coaching to customers.		
>	Set goals and provide feedback to customers on progress of environmental		
	activities.		
>	Create opportunities to project a positive image of community that you		
	manage.		
\	Identify your impact to the society and communicate the impact with the		
	community.		
	Organise activities to foster unity and camaraderie.		
>	Create opportunities for sharing of goals and accomplishments.		
>	Encourage customers to choose products / materials that have incorporated		
	green considerations.		
Cu	stomers' Feedback		
	Solicit feedback from customers.		
	Respond appropriately to customers' comments and enquires.		
Int	fluence your Suppliers / Contractors		
>	Inform suppliers of your environmental policy and provide them with a		
	mission statement.		
	Work with suppliers to identify environmentally friendly products to		
	substitute those less friendly options.		
>	Encourage suppliers to provide documentation that guarantees the		
	"environmentally friendly" authenticity of the products.		
	Adopt green specification in tendering to select suppliers offering		
	sustainable green products.		

		Yes	No
A	Give preference to environmentally friendly products or environmentally responsible suppliers / contractors.		
A	Invite suppliers / contractors to participate in community support programme(s) or environmental partnership programme with the public / private sector / NGOs.		
Influence on the community			
\	Share experiences in setting up the environmental programme with the community.		
\	Identify your impact to the society and communicate the impact with the community.		
\	Get involved in and support local environmental activities (e.g. community recycling programme).		
>	Set up donation boxes and give proceeds to local environmental charities.		
>	Publish environmental / sustainability / ESG reports.		
>	Report your environmental achievements in newsletters, magazines and other publications.		
\	Apply for relevant awards or labels to gain formalised recognition for your efforts.		
>	Collaborate with other organisations to promote environmental protection.		

Appendix 2 – Highlights of Best Practices for the Shops and Retailers Sector (for SMEs)

- Involve top management (e.g. Board of Directors) in environmental protection and commitment as they are vital for the successful implementation of environmental initiatives.
- Establish an environmental policy, align business strategy to United Nations Sustainable Development Goals and develop an environmental management system, such as developing ISO 14001 environmental management system to implement and monitor environmental management practices systematically.
- Develop and adopt E-Workflow system in daily operation to go paperless (e.g. issue e-receipt for customers), and consider using e-catalogue for promotion.
- Allocate resources for organising environmental programme for staff members, sponsoring external environmental programmes, and establishing environmental communication channels both internally and externally.
- Offer incentives or rewards to staff members for their environmental initiatives, participations or achievements (e.g. bring their own reusable cutleries).
- Adopt the concept of upcycling and repairing to reuse products and reduce waste, and offer discount or e-voucher for customers who choose upcycled or second-hand products.
- Encourage customers to bring their own bags to reduce or even refuse the distribution of plastic bags and shopping bags.
- Provide option for customers to choose products without gift box when making order to minimise packaging waste.
- Collect and reuse the packaging materials such as cardboards and wooden pallets, or adopt simple packaging.
- Donate excessive products to underprivileged families or people in need so as to minimise waste.
- Provide recycling boxes in the retail shops and offices to collect paper, metal, plastic, glass bottle, waste rechargeable batteries and fluorescent lamps for recycling.
- Install water dispenser in store to encourage staff members / customers / suppliers to bring their own bottles instead of buying bottled water.

- Record the resource consumption data such as electricity and water consumption amount and monitor the resource saving performance.
- Adopt energy saving initiatives to combat the global climate change problem and to reduce the operating cost, including:
 - o Install energy saving lightings (e.g. LED lights) in retail stores and warehouses;
 - Use energy-efficient equipment with Grade 1 or 2 Energy Label issued by the Electrical and Mechanical Services Department (EMSD) or equivalent; and
 - Adopt lighting control systems and ventilation systems to avoid excessive usage during non-business hours.
- Maintain a good indoor air quality within the retail shops and offices by using air purifiers.
- Promote green concepts to the customers through posting posters, slogans and reminders with environmental protection message in retail stores, and also deliver green message via newsletters, company websites and social media platforms.
- Provide environmentally friendly products, such as rechargeable torch, eco-friendly fibre boards and low formaldehyde paint to customers.
- Purchase and adopt green products in the retail shops and offices, for instance, FSC / PEFC certified paper, bamboo tissues, electrical appliances with Energy Label Grade 1, and ecofriendly cleaning detergent.
- Operate vehicle fleet complying with Euro-VI emission standards for transportation and rearrange logistic routes for deliveries, in order to avoid unnecessary travelling and road emissions.
- Inform suppliers of your environmental policy and provide them with a mission statement. Work with suppliers to identify environmentally friendly products to substitute those less friendly in the operations. Give preference to environmentally friendly products or environmentally responsible suppliers / contractors.
- Motivate staff member and stakeholders to support and participate in various community activities (i.e. tree planting, beach clean-up, barters, carbon reduction programmes and biodiversity conservation programmes, etc.).
