## 學校 - 小學 Schools - Primary

### 香港培正小學 Pui Ching Primary School

香港培正小學把校園營造為一個綠色大教室，將環保教育滲透到全校。校內設有環境教育中心、天台花園、植物徑、中藥園及蝴蝶園等設施。校方亦與不同政府部門及環保組織合作，開發數碼立體噪音評估工具及進行水資源及碳排放審計活動。各學科均編定與環境保護有關的專題研習和增值課程，本校更自行編定校本環境教育課程 - 「環保孩子自我挑戰獎勵計劃」。

Pui Ching Primary School is a large green campus with environmental protection elements everywhere. We devote ourselves to developing environmental education. We have established an environmental education centre, a roof garden, a plant path, a Chinese herb garden and also a butterfly garden on our campus. We also co-operate with different government departments and green organizations, to carry out different programmes and activities, for examples, a 3D noise model, a water audit and carbon audits. We have environmental protection enhancement programmes and projects as part of all study subjects and we have developed a school-based environmental protection curriculum, the "Eco-kids Self-Challenge Scheme", for our students.
