## 衡睿有限公司 EcoSage Limited

衡睿在進行回收處理工序中積極減少能源消耗，並利用環保技術處理電子廢料及金屬提煉。我們不斷開拓回收物料的種類，為不同行業增加回收量，同時減少廢物產生。

EcoSage proactively reduces energy consumption during its recycling operations and ensures that all the electronic waste is recycled by applying environmental smelter technology to recover metals. We continue to expand the recycling materials spectrum in order to increase the recycling rate in different industries and reduce the waste generation.

含有害物質的電路板在本地經過初步處理後，經文匯和國際認可環保技術的海外機構進行金屬回收處理。

Printed Circuit Boards which contain toxic materials are pre-processed locally and then sent to internationally recognised overseas smelter facilities for metal recovery.

拆機增加噪音防護裝置，以減少噪音。

Recycling equipment is installed with vibration absorbance device to reduce the noise level.

積極增加回收物料種類，為不同行業制定回收方案。

Proactively increasing the spectrum of recycling materials and providing recycling solutions for different industries.

設立社區回收中心，鼓勵商戶居民回收及建立持續回收文化。

Setting community recycling depot to encourage households to increase their recycling quantity and sustain the recycling culture.
